

Mobile Folding Series

OUR STAGING SYSTEM

Transtage's Mobile Folding Series offers excellent flexibility within your Staging system, with all the required accessories, these systems are intuitive and definitely the most 'immediately mobile' system on the market. Roll your Stage Decks out on Caster wheels ... with a few clicks and clips, your Stage is set! It doesn't get much easier than that! With Adjustable height options as 400-600 mm and 600-800 mm, our Mobile Folding solution can cater to most Staging scenarios. Each Stage Deck (when unfolded) measures 2.44 x 1.83 metres, or 8 foot x 6 foot. This covers an amazing area of over 4.4 square metres, this means that you require less decks to create quite large Staging Systems if/ or as required, and for the Staging handlers - this makes for a more efficient setup time.
