

Mobile Trailer Stage

OUR STAGING SYSTEM

You can tow your stage everywhere a vehicle can access when it takes the form of a high-quality, dual axle aluminium trailer. With our Mobile Trailer Stage, you can set up a covered stage virtually anywhere. Rig your lights to the front and rear framework of the truck, and make your stage as dramatic or impressive as you dare. The Mobile Trailer Stage Series features a black backdrop from roof to floor right across the rear, steps with a handrail, and a stage-to-ground skirt for a professional finish.
